#### C. Teaching Innovation and Recognition

*Describe any significant new course/program development, use of innovative pedagogical methods (e.g., simulations, blended learning, use of case study method), and list any teaching awards.*

My teaching philosophy is centered on fostering **future-ready accounting and finance professionals** by bridging theoretical rigor with contemporary industrial demands. I believe the classroom must serve as a dynamic environment where students move beyond rote memorization to apply critical thinking to complex, emerging challenges.

A primary pillar of my instruction involves the integration of **FinTech and Blockchain** topics. My recent, extensive professional certifications in these areas (including specializations from INSEAD, Duke University, and the University of Michigan) allow me to deliver curriculum that is informed by the most current trends in digital competition, payment technologies, and crypto assets. My goal is to ensure students graduate with a nuanced understanding of how technology transforms core areas like auditing, financial reporting, and risk management (such as anti-money laundering, a topic I have researched extensively). I also maintain a strong commitment to mentoring, as evidenced by my supervision and examination of numerous Master's theses on topics like FinTech adoption and entrepreneurial performance. On 2021 I received a ward for academic teaching excellence
